DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 8 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 8, the phrase "or the like" does not clearly recite any particular structure or function and is indefinite. Correction is required.

Regarding Claim 13, the structure required to perform the recited functionality is not clearly recited. Correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-21 are rejected (to the extent understood) under 35 U.S.C. 102(b) as being fully met by Ogawa et al. (USP 5525062).

Regarding Claims 7 and 15, Ogawa discloses a training apparatus for singing which comprises a first input device 10 structured and arranged to receive a voice signal from a singer's performance, a second input device 1,8,30 structured and arranged to receive a reference voice signal, a processor 33 coupled to said first and second input devices, structured and arranged to compare, during said singer's

performance, at least one property of said voice signal selected by a user with the same at least one property of said reference signal, and an output device 302 structured and arranged to provide feedback to said singer during said singer's performance based upon said comparison.

Regarding Claim 8, the system is a module of another system such as karaoke (Col. 1 line 9).

Regarding Claims 9,16, the feedback is visual (Figs. 23 and 24) or auditory (Col. 9 lines 42-53).

Regarding Claims 11,18, the comparison and feedback is carried out at a plurality of intervals $t-1, t-2, \dots$ (Col. 14).

Regarding Claims 12,19, the output device further provides said singer at the end of said singer's performance with a summary report of each of said at least one properties of said singer's performance (Col. 7 lines 45-52).

Regarding Claims 14,20, the initial value N set by operating means 33 reads on calibrating the processor to improve the quality of the comparison (see Col. 12 lines 1-4).

Regarding Claim 21, Ogawa discloses a first audio source 1,3,8 that emits an audio signal and a device 30 for creating a reference voice signal by removing accompaniment from said audio signal (Abstract).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
